				<b>Total Value</b>	
<b>Pre Delivery Check</b>					
Which telephone line (number) will be used for the ADSL connection?					
What devices are currently connected to that telephone line?					
<p><b>Lincoln Computer Centre does not warrant</b> that your internet connection will be trouble free. There may be telephone line issues, or software issues related to the operating system, modem and driver software. If your internet browser and email software is not current, there may be issues related to the upgrading of one or both, or there may be browsing or email issues if the software is not updated. <b>Anti-virus software</b> is strongly recommended as the likelihood of being sent a computer virus via email is now 100%. If there are any additional costs related to the configuration of your internet connection we will advise you first.</p>

## Important Information

- **\$139 once-off setup and activation fee applies to new ADSL services.**
- **Special Offer:** Transfer (churn) of an existing ADSL service from other participating ISPs is currently *free of setup charges from Internode (\$0 setup)*.
- No Contract commitment, a \$65 early termination fee applies if service is cancelled within 6 months.
- Monthly payments may only be made via credit card.
- The service can also be invoiced on a quarterly basis, paid in advance.
- ADSL services are non-refundable.
- Each Unlimited ([Shaped](#)) plan can also be chosen as a [Premium](#) plan instead.
- [Premium](#) plans incur an 8 cent per MB excess download fee for downloads over your monthly download quota, limited by our [safety-net cap on excess fees](#).
- Definitions:
  - MB is Megabyte
  - GB is Gigabyte, 1 Gigabyte is equal to 1,000 Megabytes
